Dock LED light

- Robust and reliable steel structure
- Quick and safe loading
- Optimising the handling process
- Additional loading and unloading protection
- Improved working comfort
- Easy installation

GENERAL INFORMATION

Dock lights are the most energy-efficient replacements for outdoor halide lamps. In combination with the articulated extension arm, they provide ideal lighting for the loading area. They are IP65-rated, which means they are fully protected against dust and water, e.g. during rain.

The set includes:

- LED halide
- Articulated extension arm
- Mounting anchors

AC 082

Technical data

Power consumption	30W
Light output	100lm/W
Total luminous flux	3000 lm
Display dimensions	139x164x29 mm
Dimensions of the lamp	1100x40x40 mm
Input voltage range	220-240 VAC
Frequency	50/60 Hz
PF ratio	0,9
Color temperature	4000 K
Angle of world distribution	110 °
Shelf life	25000 h
Leakage class	65 IP
Degree of protection	5 IK
Class of electric shock protection	I
